

Sampler kits

Most of the sampler designs are based on "full size" sampler motifs from the 18th and 19th Centuries. They are worked on 28 count or 32 count evenweave fabric with stranded cotton. A fully finished wooden frame, to mount the stitched sampler in, is also included in each kit.

Staircarpet kits and charts

Each staircarpet kit is worked on 18 count canvas and contains enough materials to make a staircarpet 20ins. long (50 cm). This is enough for a 15-step flight. The staircarpet instruction sheet includes details of how to measure your staircase before you begin, to determine how long to make your carpet. The pictures below show short sections of each carpet, to illustrate the pattern repeats. The width of each carpet is shown below each picture. The § symbol indicates that co-ordinating items are available.

Amy (beige)
